

CIMEC Mondial Gravity Filler

CIMEC's Mondial Gravity Fillers are built using the most advanced and latest technologies, and they can fill still bottles up using gravity or light vacuum.

There are also a wide range of available filling valves if required.

The use of this machine allows for better priming and absence of dripping. A further optional system change can allow for the valves to prevent air from entering the tank preserving product integrity against oxidation and microbiological pollution.

57 – 59 Banbury Rd Reservoir 3073
